

Security of Critical Infrastructure SOC

CAPABILITY

“

**We empower organisations to protect
critical infrastructure through expert advice.**

Troy Edward, CCS Founder and Managing Director

At Complete Crisis Solutions (CCS), we specialise in delivering comprehensive programs tailored to meet the stringent requirements of Australia's Security of Critical Infrastructure (SOCI) framework.

WHY CCS?

- Our SOCI solutions are bespoke and tailored to every client.
- Our skilled consultants have decades of experience in security risk management and specialise in the **energy, renewables and water sectors**.
- Our philosophy is to simplify the concepts of security, crisis and emergency management to make them user-friendly and transparent.
- We streamline traditional approaches in an environment of amplified scrutiny and risk.
- We are proudly Australian owned and operated.

Whether you are addressing physical security, operational resilience, or compliance with evolving regulatory demands, we combine technical expertise with a client-centred approach to create tailored solutions.

WHAT WE DO – SOCI

- Identify your Material Risks;
- Identify your Critical Infrastructure and Critical Workers;
- Conduct risk assessments for the four threat vectors of personnel, physical security and natural, supply chain and cyber and information security;
- Write a comprehensive uplift program to minimise risks to prevent incidents and help you mitigate the impact of realised incidents; and
- Develop your Critical Infrastructure Risk Management Program (CIRMP) to submit to Department of Home Affairs (DoHA).

Our additional SOCI services include the development of Business Continuity Plans (BCPs) and emergency management frameworks, ensuring resilience in the face of disruption.

We also provide targeted training programs and realistic exercises designed to prepare teams for crisis scenarios,

ADDITIONAL SERVICES

- Critical Workers Policy and Procedures;
- Asset Security Risk Assessments (SRAs);
- Business Continuity Plans (BCPs), training and exercises;
- Emergency Management Frameworks, Plans, training and testing;
- Cyber desktop exercises; and
- Crisis Management Plans, training and exercises.

Who we are
